

HOW TO OPEN THE AMPOULES

1. Always make sure that the ampoule has not been previously tampered with by inspecting the security band around the neck.
2. Shake well before opening and hold upright to ensure that all the contents are in the bottom part of the ampoule.
3. Holding the base of the ampoule firmly with one hand, use your other hand to fit the dispenser cap on the head of the ampoule.
4. To open the ampoule, press to one side using the dispenser cap until the ampoule breaks and the top comes off.
5. Discard the top of the ampoule.
6. Attach the empty dispenser to the ampoule so that the contents can be poured out.
7. To apply the product, gently squeeze the dispenser and pour out the contents into the palm of your hand.

NOTE: If the ampoule fails to break properly, discard and use a new one.
